EX.NO:10)(

Internetwork using Switch, Router and Ethernet cables

AIM :-

To design and configure an internetworking using a switch, router and Ethernet cables in cisco packet traces.

ALGORITHM/PROCEDURE :-

1) Open cisco packet tracer.

2) Place one cisco 2911 router, 12960-24TT switch & 3 PCs.

3) Connect the router to the switch using a copper straigh through cable.

4) Connect the IP addres. to the router interface.

5) Assign static IP addresses to all PCs.

6) Assign static IP address to the router interface.

7) Configure the default gateway of each PC using router's IP address.

8) Enable the router interface using no shut down command.

9) Check router interface status using show ip interface brief.

10) Test connectivity between the PC's using ping command.

11) Use simulation Mode & observe the packet travelling the Swich & router.

12) Observe how the switch forwards frames to the appropriate destination port.

RESULT:-

The internetwork was successfully designed and configured in cisco packet tracer. Communication between the connected devices was successfully verified using ping command.
