HUB

AIM:-

To study the behaviour of a Hub by observing how it forward data packets using Cisco Packet Tracer.

STEPS:-

- Open Cisco Packet Tracer.
- Drag and place 1 Hub and 4 Generic PCs into the workspace.
- Connect all PCs to the hub using copper straigh - Through cables.
- Configure IP addresses for all PCs in the same network.
- Select Add simple PDU from the comman Tools bar.
- Send a packet from one PC (source) to another PC (destination).
- Switch to Simulation Mode and observe how the Hub forwards the packet.

RESULT:-

The Hub broadcasts the received packet to all connected devices. Every PC receives the packet, but only the destination PC accepts it, while the others discard it.
